WARRANTY

THE *MAGNUM* LINE OF EGR COOLERS AND COMPONENTS FOR LIGHT, MEDIUM, AND HEAVY-DUTY APPLICATIONS OFFERS THE INDUSTRY'S WIDEST RANGE OF COVERAGE - A LEVEL OF QUALITY EXCEEDING THE OEM, THE INDUSTRY'S BEST WARRANTY, AN EXTREMELY COMPETITIVE PRICE POINT, AND UNRIVALED AVAILABILITY. A BETTER VALUED EGR COMPONENT DOES NOT EXIST. THE HEAVY-DUTY RANGE OF COMPONENTS CARRY A 13 MONTH / UNLIMITED MILEAGE WARRANTY AND THE LIGHT-DUTY RANGE CARRIES A 13 MONTH / UNLIMITED MILEAGE WARRANTY THAT ALSO COVERS REPLACEMENT LABOR.

THE *MAXFILTER* DIESEL PARTICULATE FILTERS LIFETIME WARRANTY COVERS MANUFACTURERS DEFECTS FOR THE LIFE OF THE FILTER, ON THE VEHICLE IT WAS INITIALLY INSTALLED ON. IT DOES NOT COVER FILTER DEFECTS THAT ARE THE RESULT OF IMPROPER MAINTENANCE OR ASH REMOVAL, OR DAMAGED DUE TO FAILURE OF RELATED PARTS. MAX FILTER WARRANTY COVERAGE IS MONITORED BY AN INDEPENDENT THIRD PARTY. INFORMATION CAN ONLY BE ACCESSED BY USING THE FILTER SERIAL NUMBER. TO ACTIVATE LIFETIME WARRANTY COVERAGE, THE INSTALLER OR END USER MUST COMPLETE THE REGISTRATION FORM WITHIN 30 DAYS OF PURCHASE. UNREGISTERED FILTERS ARE AUTOMATICALLY ELIGIBLE FOR 12-MONTHS OF WARRANTY COVERAGE.

ALL DIESEL PARTICULATE FILTERS AND DIESEL OXIDATION CATALYSTS *NOT* UNDER THE MAXFILTER BRAND CARRY A TWO-YEAR WARRANTY.

exchange

THE "EXCHANGE" LOGO APPEARS NEXT TO PARTS IN THIS CATALOG THAT CARRY AN ADDITIONAL CORE CHARGE.

IN THE EVENT NO CORE IS PRESENTED AT THE TIME OF PURCHASE, A CORE CHARGE WILL BE INVOICED. ALL CORE CHARGES MUST BE PAID (OR AN ACCEPTABLE CORE RETURNED) WITHIN THIRTY (30) DAYS. CORE CREDIT WILL BE EQUAL TO THE AMOUNT CHARGED ON THE ORIGINAL INVOICE FOR AN ACCEPTABLE CORE - THAT MEETS THE CORE ACCEPTANCE/POLICY STANDARDS. ACCEPTABLE CORES MUST BE RETURNED WITHIN ONE YEAR FROM DATE OF ORIGINAL SALES INVOICE FOR FULL CREDIT.

ANY AND ALL MANUFACTURER NAMES, MODELS, PART NUMBERS, AND PRODUCT IMAGES HEREIN ARE PROPERTY OF THEIR RESPECTIVE OWNERS AND ARE BEING USED FOR REFERENCE PURPOSES ONLY. PRICING AND AVAILABILITY ARE SUBJECT TO CHANGE.

ANY AND ALL MANUFACTURER NAMES, MODELS, PART NUMBERS, AND PRODUCT IMAGES HEREIN ARE PROPERTY OF THEIR RESPECTIVE OWNERS AND ARE BEING USED FOR REFERENCE PURPOSES ONLY. PRICING AND AVAILABILITY ARE SUBJECT TO CHANGE.

What is a Particulate Filter?

- Serves as a ***Garbage Can*** for your Diesel Exhaust System.

- Designed to control emissions by ***Trapping Particulate Matter*** within a filter.
- The DPF impacts overall performance and efficiency of the vehicle.

Internal Structure of a DPF

- ***200 Cells per inch*** create porous surface area to trap particles entering filter.

3/64" square x depth of filter

Image provided by Greentec Environmental.

- ***Porous Wall Structure*** creates large surface area for air to pass through and around.
- Soot can build up on square area of surface or anywhere within the wall.

How The Filter Works

- Air passes through a catalyst prior to entering the particulate filter, adding oxygen chemical to nitrogen oxide & carbon monoxide coming out of exhaust.
- Exhaust is turned into carbon dioxide and nitrogen dioxide prior to entering the DPF.

Image provided by Greentec Environmental.

- Filter fills up with Hydrocarbon soot & Nitrogen Dioxide present in exhaust.
- Inlet cells of the DPF are plugged at opposite ends.

Images provided by Greentec Environmental.

- Plugs force dirty air through porous ceramic wall. Particles larger than 0.5 microns are trapped in filter wall.

- Clean air exits filter.

What is in Diesel Exhaust

- In a perfect world, soot from diesel fuel can be 100% burned up.
- Only 80% of fuel is burned during combustion.
- Soot also contains fuel additives, oil additives, bypass oil from rings and seals & metal particles.
- These particles cannot be completely burned during the regeneration process, resulting in ash.
- Ash is what stays in the filter and ultimately needs to be physically removed for filter to function properly.

Filter Regeneration

- Perfect filter operating temperature is roughly 1300°F, that's when the filter will regenerate on its own.
- Unburned soot inside the filter will eventually cause backpressure.
- This signals the engine it is time to be "cleaned" and begins the regeneration process.
- Engine doses raw diesel fuel on face of catalyst.
- This oxidizes fuel and creates heat at nearly 1300°F.
- Regeneration process begins which burns soot and creates leftover ash.

Fuel Efficiency Example

Filter Efficiency	Miles per Gallon	Average Miles per Day	Gallons Used per Day
Under 50% Contamination	7 mpg	550	78.57
60% Contamination	6.65 mpg	550	82.71
70% Contamination	6.3 mpg	550	87.30

- A filter contaminated at 70% can cost you $339.60 per month…or more…per truck!
- For every 2% a filter is dirty, over 50%, you lose 1% of fuel economy.
- DPF warning light does not come on until the filter is 75% to 80% contaminated.

Based on average of 550 miles per day. Twenty days of travel per month.
Using an average diesel fuel cost of $1.945 per gallon.

Survey Results

- Based on roughly 55,000 respondents.
- Accrued an estimated 5.3 Billion miles in 2014.
- Nearly 54,000 units were Truck-Tractors.
- ***Record Number*** of Class 8 truck orders in 2014
  Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.
- Truck-Tractors are replaced on average every ***6.7 Years***
  Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.
- Average Marginal Costs have ***Increased 5.5¢*** per mile from 2008-2014
  Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.
- Average marginal costs were lowest in Midwest (13.7¢) and highest in Northeast (18.3¢)
  Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.
- Despite falling fuel, permit and licensing costs, average marginal costs continue to increase
  Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.

American Transportation Research Institute Survey

Region	% of Miles Traveled in U.S.
Southeast	31%
Midwest	27%
West	16%
Northeast	15%
Southwest	10%

Source: American Transportation Research Institute (9/2015): An Analysis of the Operational Costs of Trucking: 2015 Update. Retrieved from www.atri-online.org.

What's Creating Demand?

- ***EPA requirement*** on Class 5 or higher diesel powered trucks, model year 2007 & newer.
- ***3.46 Million Class 8 Trucks*** on the road in the United States
  Source: American Trucking Association (updated 8/15), Professional Truck Drivers and the Trucking Industry. Retrieved from www.trucking.org
- Professional drivers logged over ***275 Billion miles*** in 2013
  Source: American Trucking Association (updated 8/15), Professional Truck Drivers and the Trucking Industry. Retrieved from www.trucking.org

MaxFilter Advantage

- **New Filter** not remanufactured or service unit.
- ***No Core Charge*** – saves hundreds.
- Backed by our ***Lifetime Warranty*** covering manufacturer defects for the life of the vehicle.
- Saves money vs OE options.
- Manufactured to ***Exact OEM Specifications***.
- ***OEM Style Fit*** for quick installation.
- No modification, cutting or welding required.
- Substrate loading is duplicated.
- Substrates cured in oven for one week.
- Precious Group Metals are dip coated to match OEM.
- Matches OEM porosity between 28-33%.

MaxFilter Accessories

- Gaskets are OEM construction.
- Graphite or woven steel materials.
- Clamps are OEM design, v-style clamp.

- ***Lifetime Warranty*** that covers manufacturer defects for as long as you own the vehicle.
- Quality, reliability and peace of mind for years to come.
- Better than OE warranty coverage.

Visit www.AreaDieselService.com for complete warranty coverage & requirements. Not everyone qualifies for Lifetime Warranty coverage. Applies to original purchaser and vehicle.

- ***No Core Charge*** with purchase.
- ***New Filter*** in the box - Not a remanufactured product.
- Popular model coverage with expanded part numbers scheduled every quarter.
- Built to exact OEM standards. No modification, cutting or welding.

- Uses same materials throughout filter as original OE manufacturer.
- Substrate loading equal to OE part.
- Precious Group Metals dip coated matching OE process.
- Designed to work with the trucks emission control system.

DIESEL OXIDATION CATALYST

- **New** not remanufactured or service unit.
- ***No Core Charge*** – saves hundreds.
- Backed by ***Warranty***
- Saves money vs OE options.
- Manufactured to ***Exact OEM Specifications***.
- ***OEM Style Fit*** for quick installation.
- No modification, cutting or welding required.
- Diesel Oxidation Catalyst (DOC) oxidize (burn-off) harmful pollutants.

- Low Maintenance/Easy Install! DOCs designed to minimize the formation of accumulated particulate matter. The compact and efficient design of the diesel exhaust gas purifier allows for easy installation and service with minimal equipment downtime.
- If a DOC is cracked, broken, or soaked in oil or antifreeze (which will breakdown the chemical makeup of the part) it will no longer work properly. And it can even cause the DPF to fail.
- The exhaust stream of your equipment may have a diesel particulate filter (DPF), diesel oxidation catalyst (DOC) or both. Contact your sales represenative for additional coverage information.
